

Anti-Slip Grooving

Cow Shed Grooving:-

- Reduces slips and Injuries.
- Improves water run-off.
- Makes concrete surfaces safer for people, animals and machines.
- Grooving can be done in between milking. Cows can walk on surface immediately after grooving.

Grooving:-

- Car Park areas
- Ramps

Is a proven non- slip technique for slippery hazardous surface's.

Areas can be used immediate after cutting, so down time is kept to a minimum.
