

## Hand Saw Cutting

Hand sawing is very versatile and can be used in nearly every situation where cuts are required.

Pro-Cut Concrete's operators are highly skilled and equipped with petrol, hydraulic and electric powered hand saws. Petrol and hydraulic powered hand saws have a maximum cutting depth of 200mm while electrically powered hand saws have a maximum cutting depth of 130mm.

Concrete Cutting Saws are fitted with a diamond tipped blade. They are used for cutting vertical and horizontal surfaces that require a good straight cut leaving a clean edge on completion.

- Formation of new doorway and window openings
- Expansion cuts in new slabs
- Demolition cutting to wall and floors
- Penetrations for service ducts
- Chasing for electrical and plumbing services
